DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1, drawn to a container apparatus having a lenticular area affixed, classified in class 359, subclasses 619 and 455.
 - II. Claims 2-20, drawn to a process for producing plastic material having parallel lenticular embossing, classified in at least class 359, subclasses 619 and 620; and class 355, subclasses 33, 22 and 132.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case, a lenticular lens sheet of the present invention can be made of glass or plastic; and a lenticular lens sheet can be made by embossing, casting or extrusion.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. This application contains claims directed to the following patentably distinct species of the claimed invention:

The following process claims are directed to embodiments as follows:

Group II, Species I, claims 2-5, 12-15 and 20 are directed to an process as depicted by figure 21 and embodiment described in at least page 21, line 31 through page 22, line 2;

Group II, Species II, claims 6-7, are directed to a process as depicted by figure 23 and embodiment described in at least page 22, lines 3-9;

Group II, Species III, claims 8, 16 and 18, is directed to a process as depicted by figure 26 and embodiment described in at least page 22, lines 20-24;

Group II, Species IV, claims 9 and 19, is directed to a process as depicted by figure 27 and embodiment described in at least page 22, lines 25-31; and

Group II, Species V, claims 10 and 17, is directed to a process as depicted by figure 25 and embodiment described in at least page 22, lines 15-19.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 11 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ricky L Mack whose telephone number is (571) 272-2333. The examiner can normally be reached on Monday-Friday (6:30 AM to 4:00 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Georgia Y. Epps can be reached on (571) 272-2328. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
